

# NATIONAL MECHANIZED CUTTING SERVICES

## Take the Headaches and Hassles Out of Cutting Systems

For cutting precision, performance and productivity, our technicians will recommend the best plasma or oxy-fuel cutting system for your applications and operations. We'll install your system and show you how to use it for the best quality, productivity and profitability results. We'll handle all necessary maintenance and servicing. And we'll provide all the necessary consumables, gas and repair parts to keep your processes and profits flowing.

### Service and Repair

- Authorized service and repair of many of the industry's leading CNC plasma and flame cutting equipment
- Maximize equipment productivity and performance while lowering operating costs by taking advantage of our scheduled service and maintenance programs

### Preventive Maintenance

Keeping your cutting tables operational can be challenging. With our preventive maintenance program, you will have less downtime, and you may qualify to save as much as 25% off our hourly rates for all of your service needs.

Our scheduling agents take care of tracking your maintenance schedule and our expert technicians provide the following services on-site:

- Internal cleaning and inspection of plasma power supply
- Replacement of power supply air and coolant filters when required by PSP plan
- Inspection of all plasma cables and testing of the torch head
- Machine control inspection and parameter tuning
- Machine rail inspection
- Inspection and recalibration of machine square
- Machine guide bearing and main wheel inspection
- Rack and pinion inspection
- Drive system inspection and calibration
- Grounding system test and inspection
- Torch lifter(s) inspection and calibration
- On-site operator training

## Retrofit and Retooling

- Partial to complete turn-key solutions for upgrading older equipment
- Retrofit lease options
- Complete turn-key upgrade and retooling solutions

## New Equipment Sales and Leasing

We are authorized distributors for Koike, Retro Systems, Burny Kaliburn, Hypertherm, Victor Thermal Dynamics, and C&G Systems, as well as many other quality manufacturers. We help you decide the best equipment for your needs, install and support cutting systems in any size and capacity.

## Software Sales and Training

We have OEM certified technicians who will help you determine the best software solution for your needs. We will then supply you with training in your facility or arrange free OEM supplied on-line training.

## Authorized Distributors and Trainers for

- Hypertherm CAM Solutions
  - ProNest2012
  - TurboNest
  - NestMaster
  - DesignToFab
- SigmaNest

## Equipment Relocation

With OEM factory trained technicians who specialize in CNC cutting equipment installation, service and training you are assured of the proper installation of rails, gantry, plasma and all other equipment specific to your cutting needs.

## Authorized Dealer/Distributor for:
